PROJECTS

- *Awwwards Website Clone*

Tech Stack: HTML, CSS, JavaScript, GSAP (for animations)

Live Link: awwardswebp2.netlify.app

Built a visually dynamic and interactive clone of the Awwwards.com homepage to showcase frontend design capabilities.

The site features: Smooth scroll-based animations and transitions using GSAP (GreenSock Animation Platform) Custom cursor interactions, animated navigation, and hover effects Responsive and pixel-perfect layout resembling the original Awwwards design Focus on creative UI/UX design, animation timing, and user engagement.

This project demonstrates a deep understanding of DOM manipulation, CSS animations, and frontend performance optimization.

- *SaaS Product Landing Page*

Tech Stack: HTML, CSS, JavaScript

Live Link: saaslandpage2411.netlify.app

Developed a modern and responsive SaaS product landing page designed to promote software services effectively.

Key features include: Clean and attractive UI layout with well-structured content sections Responsive design ensuring mobile and tablet compatibility Smooth scrolling navigation with a focus on user experience Use of modern design principles for hero section, features, pricing, and testimonials Built from scratch using only HTML, CSS, and JavaScript, highlighting frontend development skills without relying on external frameworks

TECHNICAL SKILLS

- Languages: C, C++, Java, Python, JavaScript, SQL
- Web: HTML, CSS, React, Tailwind, Vite, Node, Express
- Tools: Git, VSCode, Arduino IDE, ESP32
- Database: MongoDB, MySQL

ACHIEVEMENTS

Competitive Programming & Problem Solving

- Solved **58+ problems** on [LeetCode](#) with an **82.4% acceptance rate**, demonstrating strong algorithmic and data structure proficiency (Beats 66% of users globally).
- Practiced and implemented key concepts including **Recursion, Binary Search Trees, Arrays, and Sorting** across **Easy (34)** and **Medium (24)** level problems.
- Consistently maintained high accuracy and efficiency across coding challenges, strengthening problem-solving speed and logical thinking.

Chess64: Competed in strategic chess matches, enhancing analytical and decision-making abilities.

CSS Battle: Solved design challenges under time pressure using only HTML and CSS, reflecting front-end precision and efficiency.

Blind C Programming: Coded without syntax visibility, emphasizing strong memory, logic, and understanding of language structure.
